

Alan Wu, Ph.D., DABCC is internationally known in the fields of clinical chemistry, toxicology, cardiac biomarkers and pharmacogenomics. He received his B.S. in Chemistry and Biology at Purdue University and Ph.D. in Analytical Chemistry from the University of Illinois. He was trained in clinical chemistry at Hartford Hospital and, thereafter, became a diplomate of the American Board of Clinical Chemistry in clinical chemistry and toxicological chemistry. In 1982, he accepted a position as Assistant Professor of Pathology at the University of Texas Medical School in Houston and was Associate Director of Clinical Chemistry at Hermann Hospital. He returned to Hartford Hospital in 1992 to become Director of the Chemistry and Toxicology Laboratories and became Professor of Laboratory Medicine and Adjunct Professor of Chemistry at the University of Connecticut's Farmington and Storrs campuses, respectively. In 2004, he became Director of Chemistry and Toxicology at San Francisco General Hospital and Professor of Laboratory Medicine at the University of California, San Francisco (UCSF). There, he established the first Clinical Pharmacogenomics Laboratory at UCSF.

Dr. Wu has over 500 peer-reviewed and non-peer-reviewed publications. Since 1999, he has been Editor-in-Chief of *Clinica Chimica Acta*. He has been the director of COMACC-accredited clinical chemistry post-doctoral program in Texas, Connecticut and California. Dr. Wu has received numerous awards from the American Association for Clinical Chemistry and has spoken on his research throughout the U.S., Europe and Asia.
