

Judith Thompson Weeks, MS, MBA, MT(ASCP) is a Global Outreach and Marketing Consultant with multi-faceted experience in life sciences and clinical laboratory science. Having adapted policy, strategies and technical support for both developed and resource limited countries, she is currently providing consulting services for the American Society for Clinical Pathology (ASCP) and the Centers for Disease Control (CDC). In this capacity, she has guided the Kenya National HIV Reference Laboratory, producing the first Kenya National EQA Strategic Plan; provided technical assistance for the Rwanda National Reference Laboratory establishing a National Proficiency Testing Program; and conducted Clinical Chemistry Training of the Trainers for laboratory managers throughout Rwanda. She has held senior marketing positions at Agilent Technologies, Molecular Devices, GE Healthcare, Pall Corporation, and EMD Millipore, specializing in cell biology, molecular biology and immunology. In a marketing capacity she was responsible for worldwide strategic planning, evaluating business opportunities, product portfolios and market research. Prior to that she managed the clinical chemistry laboratory at the University of Nebraska Medical Center where she was responsible for evaluation and documentation of new methods; quality control and quality assurance programs; developing clinical chemistry curriculum and training clinical laboratory science students. Ms. Weeks has conducted research and published in peer reviewed journals in the fields of oncology, endocrinology, pharmacokinetics and is co-inventor of a novel mini-spectrophotometer. Her education includes an MS in Clinical Pathology from the University of Nebraska Medical Center and an MBA in High Technology Management from Northeastern University. She is a member of the American Association for Clinical Chemistry (AACC), American Society for Clinical Pathology (ASCP) and the Association of Clinical Research Professionals (ACRP).
